

Engagement on an Urban, Rural and Northern Indigenous Housing Strategy

Indigenous Peoples, regardless of where they live, face unique barriers to affordable housing and have higher incidence of housing need than non-Indigenous households. Indigenous Peoples are also at higher risk of experiencing homelessness.

While the National Housing Strategy prioritizes Indigenous and northern housing projects, significant gaps exist in addressing the housing needs of Indigenous Peoples living in urban, rural and northern areas.

The Government of Canada, through Canada Mortgage and Housing Corporation, has committed to co-develop and launch an Urban, Rural and Northern Indigenous Housing Strategy. This survey aims to gain the views for a long-term vision for urban, rural and northern housing in Canada, identify priority areas, investments and solutions.

The input received will inform the co-development of an Urban, Rural and Northern Indigenous Housing Strategy with Indigenous partners.

This engagement process builds on the work of previous reports and recommendations on this important issue and we'd like to ask for your perspective.

We understand that sharing any negative experiences may be triggering to participants. If you need support, the following resource is available:
